

## TS 1 Fine 10 GF

### Composition

Reference: 7N1

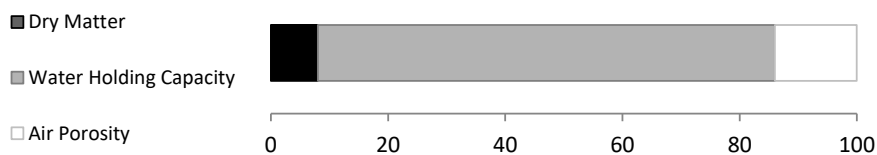

**Structure :**  
very fine

### Physical properties

pH (H<sub>2</sub>O) : 6+/-0,3 (EN 13037)

Starter fertilizer: 0,8 kg/m<sup>3</sup> 14 10 18  
Iron + Trace element

### Physical characteristics

### Use

### Comments

Seedlings  
propagation tray

White peat ensures water retention while guaranteeing good aeration.  
GreenFibre improve rewetting capacity and air porosity.  
Very fine and fluid structure for easy filling of the alveolar trays.
