

GH Tech Drip Irrigation

Cultivating effective growth together

Greentape® Drip Line

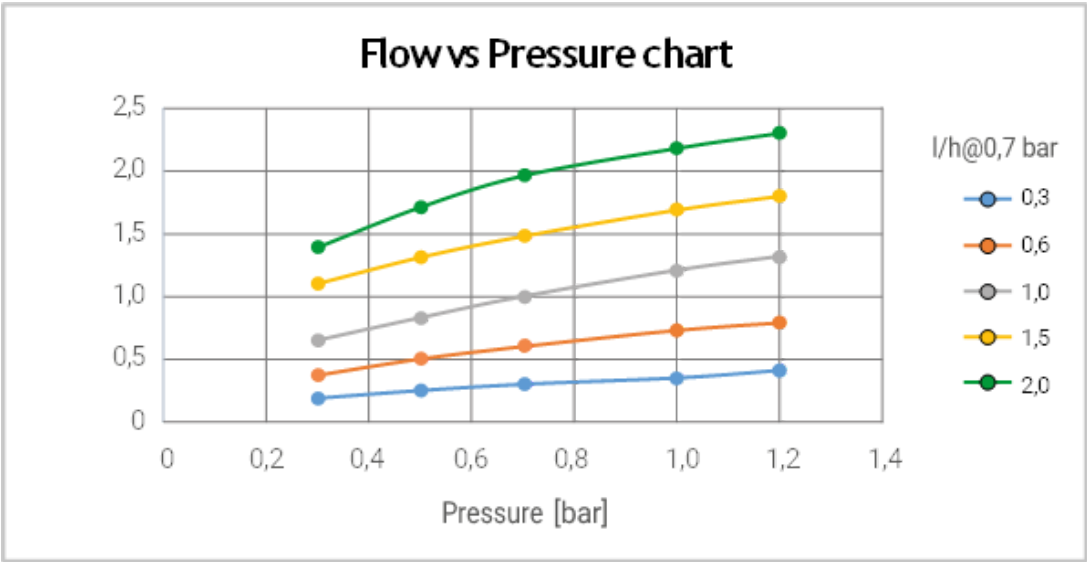

GHTech Greentape®

GHTech is proud to introduce our latest drip tape, imported directly from Europe and designed to deliver unmatched performance in the field. Built with advanced materials and precision engineering, this drip tape ensures consistent water distribution, reduces waste, and boosts crop yields – no matter the season. Trusted by top growers worldwide, this new range offers superior durability and clog resistance, making it the smart choice for farmers who demand reliability and efficiency. With GHTech’s commitment to innovation and quality, you’re not just irrigating – you’re investing in your farm’s future.

Field of Application :

- Protected crops
- Open field crops

Dripper characteristics

Recommended length in meters based on pressure:

			Ø 16 mm	
			'm	
I/h	cm	I/h-m	* 90%	85%
1,0	10	10,0	100	120
	15	6,6	120	140
	20	5,0	150	185
	30	3,3	190	240
	40	2,5	225	280

Our standard range:

Wall thickness	0.15mm - durable yet lightweight
Flowrate	1 l/h - consistent and efficient delivery
Spacing	30cm - precision watering for healthier crops
Length	3 050m - maximum coverage with ease
Operating pressure	1 bar - low pressure, high efficiency

Dripper specifications and data:

Dripper flowrate (l/h)	0.6 - 1.0 - 1.5
Standard spacing (cm)	10 - 15 - 20 - 25 - 30 - 33 - 40 - 50
Maximum working pressure	16 - 22
Minimum working pressure	0.15 - 0.22
